Specs for Stock 7 x 8 x 12 Gas Oven

- This overview is for a 7' W x 8' H x 12' L oven built to the highest standards including an industry unique floating interior shell offering the highest efficiency of any oven available. Limited heat bridges result in zero hot-spots on the exterior surface.
- This Model 7812R features a rear mount heat chamber for reduced overall height and ease of shipping.
- Exclusive floor plate walk-on roof provides a solid foundation for maintenance on the roof mounted components.
- Another exclusive is our 'Infinite Hinge System' offering maximum door adjustability for the life of the oven, and a heavy-duty pin & boss hinge to carry the load will never wear out. The unique door hanging system distributes the door weight across the entire door resulting in a lifetime of reliability.
- Explosion relief venting door latches.
- Heavy-Duty 3/16" Steel Oven Front, Base, & trim.
- 18ga Blue powder coated exterior panels.
- All aluminized interior walls, duct work, & return venting.
- Combination Air-flow delivers heated air across oven from both sides & returns upward through the vented ceiling panels for recirculation in the heat chamber.
- Premium Quality Dungs Gas Valves and gas pressure switches.
- Cleveland Controls blower air safety switches.
